Development

Softwear 6.5.14 Release Notes

Inhoudsopgave

Date	Apr 20, 2015
Issues	12 issues

1 Summary

This release marks the completion of Sprint 66. This release primarily includes smaller bug fixes and improvements to Reporting and to the POS. See the issues below for more detailed information.
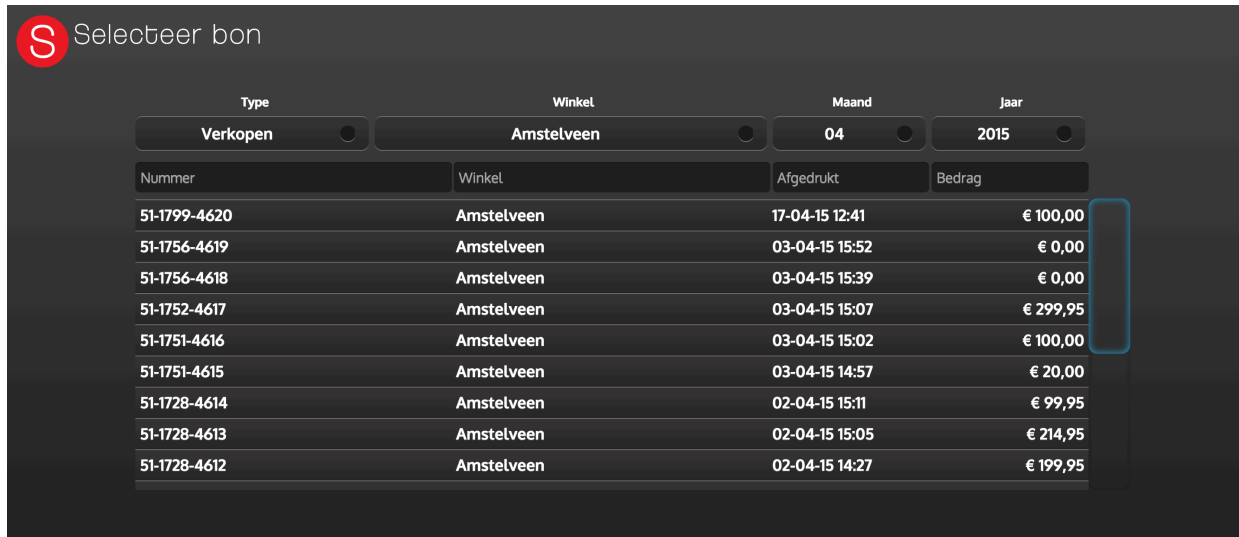

# 2 Important highlights from this release

1. All data being posted to FoxPro will go through the M2F process. This data will be stored in the events collection in MongoDB. The FoxPro API calls affected are
   a. redeemcoupon
   b. addcoupon
   c. sendtransitx
   d. sendinventory
   e. paystorecredit
   f. seteod
   g. sendorder
   h. setclient
2. Reporting updates to grouping and date selection
3. Improvements to loading customer data

3 UI Updates

Removed checkmark and syncing icons from Select Receipt and moved this to one single icon on the About Softwear popup.

New About Softwear UI to show pending event syncing to FoxPro

4 All updates for this release
